PROFILE

Computer Science graduate (Bachelor of Science Honours, Upper Second Division, NUST) who builds working systems end to end: live client platforms with Paynow payments, a WhatsApp sales agent whose every figure comes from code, and computer vision running on edge hardware. Twelve months of enterprise IT operations at ZIMDEF covering servers, networks, business systems and user support. Looking for a full-time software engineering role, remote or in Zimbabwe.

EDUCATION

Bachelor of Science Honours Degree in Computer Science, Upper Second Division 2022 to 2026

National University of Science and Technology (NUST), Bulawayo. Degree conferred 17 September 2026.

- Dissertation: edge computer-vision precision feeding for pond aquaculture (now the FishTech Precision Feeding System), submitted November 2025.

EXPERIENCE

Freelance Full-Stack Developer 2025 to present

Client systems for practices and businesses in Harare.

- Built and run Health & Longevity, a live health platform for Dr Misheck Ruwende, and The Endoscopy Suite, the website of Dr E.G. Muguti's practice.
- Built and shipped Steadyhands Catering, live and taking orders with Paynow payments.
- Every decision is dated with its reason; each change lands on its own branch with a rollback point before deploy; clients get written runbooks and manuals.

Lead Engineer, FishTech Consultancy 2025 to present

- Design and build FishTech's two products: the FishTech Precision Feeding System, a research prototype, and the standalone FishTech Feeder.
- Built and run fishtech.co.zw and the WhatsApp sales agent with its operations console.
- Exhibited the FishTech Feeder at the Zimbabwe Agricultural Show 2026 in Harare and presented FishTech at the Presidential Innovation Awards 2026.

IT Industrial Attachment, ZIMDEF 1 Jul 2024 to 30 Jun 2025

Zimbabwe Manpower Development Fund, Harare. Twelve months in a live enterprise data centre.

- Infrastructure: VMware virtualisation, Red Hat Linux servers, resource allocation, routine backups.
- Networking: supported the Sophos to Check Point firewall migration, Ruckus wireless, Cisco telephony, RADIUS authentication, VLAN segmentation and IP addressing.
- Business systems: SAP Business One, ManageEngine ServiceDesk Plus, Microsoft 365, user support.

Director, Ticket Kulture Zimbabwe 2024 to present

Online event ticketing platform with local mobile money and card payments.

SELECTED PROJECTS

Health & Longevity · healthandlongevity.co.zw Live client system

Astro, React, TypeScript, Tailwind CSS, Cloudflare Workers, D1, R2, Paynow, Vitest, Playwright, GitHub Actions

- Health platform for a Harare doctor: Paynow membership, video and in-person consult booking, paid articles and video lessons, nurse-aide requests, community, offline support and a phone-first admin area with a written manual.
- Paid article text never sits in a public file; personal details are encrypted; end-to-end and accessibility checks guard payments, private data and sign-in.

FishTech Sales Agent & Ops — Live

Python, FastAPI, Uvicorn, fpdf2, WhatsApp Cloud API, Telegram, Render

- Large language model agent with tool use on FishTech's WhatsApp line. Answers fish-farming questions in English and Shona, prices from one price list shared with fishtech.co.zw, and sends quotations as a message and a PDF.
- Code checks every reply before it goes out, large or non-standard quotations wait for approval, and every real chat that went wrong became a test. An operations console holds every chat, client and quotation.

FishTech Precision Feeding System (Iris) — Research prototype

Python, FastAPI, OpenCV, YOLOv8-Pose, ByteTrack, Raspberry Pi 5, Hailo-8L, SQLite, pytest

- Overhead camera and computer vision on the Pi that measure tilapia and catfish against a calibrated reference, estimate pond biomass with confidence intervals and set a precision feed dose. Runs at the pondside with no cloud. Pilot deployment in preparation.

The Endoscopy Suite · endoscopysuite.co.zw — Live client site

Next.js, React, TypeScript, Tailwind CSS, Vitest, Cloudflare Pages, GitHub Actions

- Website for a specialist endoscopy and surgery practice in Harare: services in plain words, preparation guides, an emergencies page with the phone number first, and appointment requests confirmed on WhatsApp.

FishTech Consultancy · fishtech.co.zw — Live company site

Astro, TypeScript, GSAP, Vercel

- Site for a Zimbabwean fish-farming services business. One price list feeds every price, and a pond calculator gives an instant cost that sends to WhatsApp for a written quote.

FishTech Feeder — Working prototype

ESP32, embedded firmware, welded steel, solar power

- Solar-powered automatic feeder: an auger turns a counted number of revolutions to measure each dose and a spinning disc spreads it. Sets the daily ration from fish size and water temperature with no internet, and can take an instruction from the precision feeding system over Wi-Fi.

Steadyhands Catering · steadyhandscatering.com — Live

Next.js, TypeScript, Node.js, Paynow, Vercel

- Catering platform at BATA Club, Harare: online ordering, Paynow payments (EcoCash, OneMoney, Visa, Mastercard) and a WhatsApp Business ordering funnel.

SKILLS

Languages	Python, TypeScript, JavaScript, SQL
Web	Next.js, React, Astro, Node.js, FastAPI, Vue 3, Tailwind CSS
Cloud and data	Cloudflare Workers, D1, R2, Vercel, Render, SQLite
Testing	Vitest, Playwright, axe accessibility checks, pytest, GitHub Actions
AI and vision	Computer vision, OpenCV, YOLOv8, PyTorch, Ultralytics, edge AI on Hailo, LLM agents with tool use
Embedded	Raspberry Pi, ESP32, sensors and actuators, IoT
Infrastructure	Linux, VMware, networking, firewalls, Git and GitHub
Business systems	SAP Business One, Microsoft 365, ManageEngine ServiceDesk Plus
Spoken languages	English, Shona, Ndebele. References available on request.
