PROFILE

Computer Science graduate (BSc Honours, Upper Second Division, NUST) who builds working systems end to end: production web platforms with live payments, computer vision running on edge hardware, and the embedded control behind it. Twelve months of enterprise IT operations at ZIMDEF covering servers, networks, ERP and user support. Looking for a full-time software engineering role, remote or in Zimbabwe.

EDUCATION

BSc Honours Degree in Computer Science, Upper Second Division 2022 to 2026
National University of Science and Technology (NUST), Bulawayo. Degree conferred 17 September 2026.

- Dissertation: edge computer-vision precision feeding for pond aquaculture (now the FishTech Precision Feeding System).

EXPERIENCE

Founding Engineer, FishTech Consultancy 2025 to present

- Lead the design and build of the company's two products: the FishTech Precision Feeding System and the standalone FishTech Feeder.
- Built and run the company website, fishtech.co.zw, with a WhatsApp-first enquiry flow for farmers.
- Exhibited the FishTech Feeder at the Zimbabwe Agricultural Show 2026 in Harare and presented FishTech at the Presidential Innovation Awards 2026.

IT Industrial Attachment, ZIMDEF 1 Jul 2024 to 30 Jun 2025
Zimbabwe Manpower Development Fund, Harare. Twelve months in a live enterprise data centre.

- Infrastructure: VMware virtualisation, Red Hat Linux servers, resource allocation, routine backups.
- Networking: supported the Sophos to Check Point firewall migration, Ruckus wireless, Cisco telephony, RADIUS authentication, VLAN segmentation and IP addressing.
- Business systems: SAP Business One, ManageEngine ServiceDesk Plus, Microsoft 365, user support.

Freelance Full-Stack Developer, Steadyhands Catering 2025
Client: Steadyhands Catering at BATA Club, Harare.

- Built and shipped steadyhandscatering.com: online ordering, Paynow payments (EcoCash, OneMoney, Visa, Mastercard) and a WhatsApp Business ordering funnel. Live and taking orders on Vercel.

Co-founder and Director, Ticket Kulture Zimbabwe 2024 to present
Online event ticketing platform with local mobile money and card payments.

SELECTED PROJECTS

FishTech Precision Feeding System Working prototype
Python, FastAPI, OpenCV, YOLOv8-Pose, Raspberry Pi 5, Hailo-8L, SQLite

- Overhead camera and on-device AI that detect and measure fish, estimate pond biomass with confidence intervals, and set a precision feed dose. Runs fully on the device with no cloud. Pilot deployment in preparation.

FishTech Feeder Prototype
ESP32, embedded firmware, welded steel, solar power

- Solar-powered automatic feeder: an auger turns a counted number of revolutions to measure each dose, and a spinning disc spreads it over the pond. Sets the daily ration from fish size and water temperature with no internet, and takes instructions from the precision feeding system over Wi-Fi.

SKILLS

Languages	Python, TypeScript, JavaScript, SQL
Web	Next.js, React, Node.js, FastAPI, Flask, Vue 3, Tailwind CSS
AI and vision	Computer vision, OpenCV, YOLOv8, PyTorch, Ultralytics, edge AI on Hailo
Embedded	Raspberry Pi, ESP32, sensors and actuators, IoT
Infrastructure	Linux, VMware, networking, firewalls, Vercel, Git and GitHub
Business systems	SAP Business One, Microsoft 365, ManageEngine ServiceDesk Plus
Spoken languages	English, Shona, Ndebele. References available on request.
